CYBERSECURITY, FRAUD PREVENTION & CUSTOMER PROTECTION POLICY

Field	Detail
Document Version	1.0
Effective Date	01 April 2026
Company	Vero360 Limited
Registration	MBRS Registered — Malawi (COY-J7RCG5G); TPIN 71241378
Registered Office	Area 14, Lilongwe, Malawi
Contact	info@vero360.app
Platform	Vero360 Super App (Android & iOS)
Status	OFFICIAL POLICY DOCUMENT

Legal Notice: This Cybersecurity, Fraud Prevention & Customer Protection Policy is issued in compliance with the laws of the Republic of Malawi including the **Electronic Transactions and Cyber Security Act 2016**, Communications Act (Cap. 68:01), the **Data Protection Act, 2024 (Act No. 3 of 2024)**, Financial Services Act 2010, National Payment Systems Act 2016, **Consumer Protection Act 2003**, **Penal Code (Cap. 7:01)** provisions on fraud and forgery, and the Malawi Constitution. It is binding on all customers, providers, merchants, courier partners, staff, and third-party vendors engaging with the **Vero360** Super App platform.

1. Overview & Purpose

This policy sets out how **Vero360** Limited protects its platform, its customers, its providers, merchants and courier partners, and its own corporate systems from fraud, cybercrime, scams, and data security incidents. It works alongside the **Platform User Agreement**, Subscription & Payment Policy, Privacy Policy, **Merchant Terms & Conditions**, Courier Partner SLA, **Provider Onboarding Agreement**, and **KYC Verification Form**, and should be read together with those documents.

Vero360 recognises that as a mobile super-app handling ride-hailing, food and parcel delivery, e-commerce, accommodation, and service bookings, it is a target for account takeover, payment fraud, fake listings, social engineering, and cyberattacks on its infrastructure. This policy exists to reduce those risks to the lowest reasonably achievable level, to give customers and partners clear channels to report suspected fraud or abuse, and to set out how **Vero360** will respond, investigate, and, where necessary, defend itself and its users through technical, operational, and legal means.

2. Regulatory Framework & Legal Compliance

Vero360 Limited's cybersecurity and fraud prevention obligations are grounded in the Constitution of the Republic of Malawi and the following legislation and regulatory guidance:

VERO360 LIMITED

Malawi's First Super App • One App. Everything.

Marketplace • Ride-Hailing • Food Delivery • Courier • Accommodation

Area 14, Lilongwe, Malawi

Regulator	Full Name	Applicable Law / Relevance to This Policy
MACRA	Malawi Communications Regulatory Authority	Communications Act (Cap. 68:01); Electronic Transactions & Cyber Security Act 2016 — cybercrime, data breach notification
RBM	Reserve Bank of Malawi	Financial Services Act 2010; National Payment Systems Act 2016 — payment fraud, escrow and gateway security
MRA	Malawi Revenue Authority	Taxation Act (Cap. 41:01) — fraud affecting tax-relevant transaction records
Malawi Police Service	Cyber Crime & Digital Forensics Unit	Penal Code (Cap. 7:01); Electronic Transactions & Cyber Security Act 2016 — investigation and prosecution of fraud and cybercrime
Consumer Protection	Consumer Protection Act 2003	Consumer rights, fair dealing, and protection from deceptive or fraudulent conduct
Data Protection	MACRA (Data Protection Authority)	Data Protection Act, 2024 (Act No. 3 of 2024) — data protection and breach notification; Malawi Constitution Section 21 (Right to Privacy); Electronic Transactions & Cyber Security Act 2016 for matters not covered by the Data Protection Act

Constitutional Basis: This policy upholds Section 21 (Right to Privacy) and Section 44 of the Malawi Constitution relating to consumer rights and protection of the economic interests of all Malawians, and supports the objectives of Section 13(e) by ensuring that commerce conducted through the **Vero360** platform remains safe and trustworthy.

3. Scope

This policy applies to:

- Customers using the **Vero360** Super App for rides, deliveries, marketplace purchases, accommodation, or service bookings.
- **Providers**, merchants, and courier partners listed or operating on the platform.
- **Vero360** staff and contractors with access to platform systems, data, or customer funds.
- Third-party vendors and technology partners, including **Paychangu** and Firebase infrastructure providers.

4. Categories of Risk Covered

Risk Category	Description	Primary Target
Payment & Transaction Fraud	Fake orders, collusive transactions, chargeback abuse, promo/commission abuse	Escrow funds, commission revenue
Account Takeover	Stolen credentials, SIM-swap, OTP interception used to hijack customer or provider accounts	Customer and provider accounts
Phishing & Social Engineering	Fake Vero360 messages, calls, or links designed to extract OTPs, passwords, or payment details	Customers, providers, staff

VERO360 LIMITED

Marketplace • Ride-Hailing • Food Delivery • Courier • Accommodation

Area 14, Lilongwe, Malawi
0888 367 037 / +265 887 261 094
info@vero360.app
www.vero360.app

Fake Listings & Impersonation	Non-existent goods/services, impersonation of verified providers or Vero360 staff	Customers
Identity & Document Fraud	Falsified NID or business documents submitted during KYC/onboarding	Provider verification system
Cyberattacks on Infrastructure	DDoS, malware, unauthorised access, SQL injection, API abuse against Vero360 systems	Platform backend, databases
Data Breach	Unauthorised access to or exposure of customer, provider, or payment data	Personal and financial data
Insider Misuse	Vero360 staff or contractors misusing system access or customer data	Internal systems

5. Customer Protection Measures

Vero360 builds customer protection into the platform itself rather than relying solely on after-the-fact remedies. The following measures apply across all service categories:

- Escrow Payment Protection — all digital payments are held in escrow via **Paychangu** and released to providers only on confirmed delivery, as set out in the Subscription & Payment Policy. This prevents customers from paying for services that are never rendered.
- Mandatory **KYC/NID** Verification — providers must complete identity verification before receiving the **Verified Badge**; unverified providers are clearly flagged in search and listings so customers can make an informed choice.
- Real-Time GPS Tracking — Vero Ride, Vero Bike, and Vero Courier trips are tracked live in-app, with trip details shareable with a trusted contact.
- In-App Ratings & Reviews — every completed transaction generates a two-way rating, feeding into provider standing and flagging patterns of poor conduct.
- Secure OTP-Based Authentication — login, payment confirmation, and trip start/end events are protected by one-time passcodes; **Vero360** will never call or message a customer to ask them to share an OTP.
- In-App Fraud & Scam Reporting — a dedicated 'Report a Problem' function is available from every order, trip, and provider profile.
- Dispute Centre Integration — suspected fraud can be escalated directly into the dispute resolution process described in the Subscription & Payment Policy, with funds frozen pending investigation.

6. Cybersecurity Framework

Vero360's technical security posture is overseen by the Head of ICT under the technical direction of the CTO, and covers the following controls:

Control Area	Measures
Encryption	End-to-end encryption of payment data in transit and at rest via Paychangu and Firebase secure infrastructure; encrypted storage of personal and KYC data
Authentication & Access	OTP-based login, role-based access control for staff systems, principle of least privilege, mandatory unique credentials — no shared logins

VERO360 LIMITED

Malawi's First Super App • One App. Everything.

Marketplace • Ride-Hailing • Food Delivery • Courier • Accommodation

Area 14, Lilongwe, Malawi
0888 367 037 / +265 887 261 094
info@vero360.app
www.vero360.app

Network & Application Security	Firewalls, TLS on all API and app traffic, secure API design, protection against DDoS, injection, and common OWASP Top 10 vulnerabilities
Security Testing	Periodic vulnerability scanning and penetration testing of the platform and backend, with remediation tracked to closure
Device & Session Security	Session timeouts, device fingerprinting, and alerts to users on login from a new or unrecognised device
Employee Security	Mandatory cybersecurity awareness training for all staff with system access; background checks for roles with access to customer funds or personal data
Third-Party Risk	Security review of payment gateway, cloud, and infrastructure partners before integration; contractual data protection obligations on all vendors
Backup & Recovery	Regular encrypted backups of platform data with tested restoration procedures to support business continuity

7. Fraud Detection & Prevention

Vero360 combines automated monitoring with manual review to detect and stop fraudulent activity before it causes loss:

- **Transaction Monitoring** — automated rules flag unusual patterns such as rapid repeat transactions, identical GPS coordinates for pickup and drop-off, or round-tripping of funds between linked accounts.
- **Velocity & Duplicate-Account Checks** — limits on transaction frequency per account and detection of multiple accounts linked to the same device, SIM, or payment instrument.
- **Promotional & Commission Abuse Controls** — introductory offers such as the Zero **Commission** Introduction require transactions across a minimum number of distinct, **KYC**-verified customers, preventing collusive or self-dealing transactions from exploiting the offer.
- **Provider Vetting** — **NID** and business document verification before listing approval, with re-verification triggered by suspicious activity.
- **Chargeback & Dispute Fraud Review** — Operations Manager review of disputed transactions to distinguish genuine service failures from attempts to reverse legitimate payments.
- **Blacklisting** — accounts, devices, and payment instruments confirmed to be involved in fraud are blacklisted platform-wide to prevent re-registration.

8. Account Security Obligations

8.1 Customers

- Never share OTPs, passwords, or account PINs with anyone, including individuals claiming to be **Vero360** staff.
- Verify driver, rider, or provider identity and vehicle details in-app before starting a trip or handing over goods.
- Make and receive all platform payments only through the in-app **Paychangu**-integrated flow — never to a personal mobile money number.

VERO360 LIMITED

Malawi's First Super App • One App. Everything.

Marketplace • Ride-Hailing • Food Delivery • Courier • Accommodation

Area 14, Lilongwe, Malawi
0888 367 037 / +265 887 261 094 📞
info@vero360.app ✉️
www.vero360.app 🌐

- Report suspicious messages, calls, or listings immediately through the in-app reporting tool.

8.2 Providers, Merchants & Courier Partners

- Keep login credentials confidential and unique to the registered account holder.
- Report a compromised account to **Vero360** immediately so it can be secured and reviewed.
- Ensure all customer transactions are conducted through the in-app escrow system — off-platform payment requests are a violation of the **Provider Onboarding Agreement** and a common fraud indicator.
- Keep **KYC** and business documentation current; falsified documentation will result in permanent suspension and referral to the relevant authorities.

8.3 Vero360 Staff

- Access to customer data and funds is granted strictly on a role-based, need-to-know basis and logged for audit.
- Staff must complete cybersecurity and fraud-awareness training on onboarding and annually thereafter.
- Any staff member suspected of misusing system access is subject to immediate access suspension pending investigation by the Legal Officer.

9. Data Breach & Incident Response Protocol

Stage	Action	Timeline
1	Detection — automated alert or manual report of a suspected breach or attack	Immediate
2	Containment — Head of ICT isolates affected systems and halts further exposure	Within hours
3	Assessment — scope, cause, and affected data/users determined	Within 24 hrs
4	Regulatory Notification — MACRA notified of confirmed data breaches affecting payment or personal information, in accordance with Section 36 of the Data Protection Act, 2024	Within 72 hrs
5	Customer Notification — affected users informed with guidance on protective steps, in accordance with Section 37 of the Data Protection Act, 2024	Within 72 hrs
6	Remediation — vulnerability closed, affected credentials reset, systems restored from secure backup where needed	As required
7	Post-Incident Review — root cause analysis and control improvements documented by the Head of ICT and CTO	Within 14 days

This protocol operates alongside the 72-hour **MACRA** breach notification commitment already set out in the Privacy Policy and Subscription & Payment Policy.

10. Reporting a Scam or Security Concern

Anyone who suspects fraud, a scam, or a security weakness on the **Vero360** platform can report it through:

VERO360 LIMITED

Malawi's First Super App • One App. Everything.

Marketplace • Ride-Hailing • Food Delivery • Courier • Accommodation

Area 14, Lilongwe, Malawi
0888 367 037 / +265 887 261 094
info@vero360.app
www.vero360.app

- The in-app 'Report a Problem' button available on every trip, order, and provider profile.
- Email to info@vero360.app, marked for the attention of the Legal Officer or Head of ICT.
- The dispute centre, for issues connected to a specific transaction.
- **Vero360** staff may also report internally through the Legal Officer as a whistleblower channel, without fear of retaliation.

Confirmed cases of fraud, forgery, or cybercrime will be referred to the Malawi Police Service Cyber Crime & Digital Forensics Unit, and **Vero360** will cooperate fully with any resulting investigation.

11. Roles & Responsibilities

Role	Responsibility
Head of ICT	Owens technical cybersecurity controls: infrastructure security, monitoring, incident containment, and coordination of security testing
Chief Technology Officer	Sets the technical security architecture of the platform and approves major system or vendor changes affecting security
Legal Officer	Handles fraud investigations, regulatory notifications, law enforcement liaison, and enforcement action against confirmed fraud
Operations Manager	First-line review of disputed transactions and suspected provider or customer fraud reported through the dispute centre
Finance Officer	Monitors payment and commission data for financial fraud indicators and reconciles escrow activity
Chief Executive Officer	Final escalation authority for major incidents; approves public and regulatory communications following a significant breach

12. Enforcement & Penalties

Violation	Consequence
Confirmed customer or provider fraud	Immediate account suspension, forfeiture of pending payouts where lawful, platform-wide blacklisting
Falsified KYC or business documentation	Permanent account termination and referral to relevant authorities
Off-platform payment solicitation	Warning on first occurrence; suspension on repeat occurrence
Promotional or commission abuse	Reversal of waived commissions, forfeiture of introductory offer, possible suspension
Staff misuse of system access	Immediate access suspension, internal disciplinary process, referral to law enforcement where criminal conduct is suspected
Malicious attacks on platform infrastructure	Access blocking, evidence preservation, referral to the Malawi Police Service Cyber Crime & Digital Forensics Unit and, where applicable, civil action

13. Third-Party & Vendor Risk Management

Vero360 relies on third-party infrastructure, principally the **Paychangu** payment gateway and Firebase cloud services. Before integration, and periodically thereafter, **Vero360** reviews each vendor's security certifications and data handling practices, and requires contractual commitments on data protection, breach notification, and cooperation with **Vero360**'s incident response process. **Vero360** does not store full payment card or mobile money credentials on its own systems; this data is handled within **Paychangu**'s secure environment.

14. Business Continuity & Disaster Recovery

Vero360 maintains regular, encrypted backups of platform data and tests restoration procedures to limit downtime and data loss in the event of a system failure, cyberattack, or natural disaster. Critical systems, including escrow payment records, are prioritised for recovery to protect customer funds and transaction integrity.

15. Policy Review & Updates

This policy is reviewed at least annually, and immediately following any significant security incident, regulatory change, or material change to the platform's payment or data architecture. Updates are approved by the CEO and communicated internally to all staff and, where they affect user obligations, to customers and providers via in-app notification.

16. Governing Law & Jurisdiction

This Cybersecurity, Fraud Prevention & Customer Protection Policy is governed by and shall be construed in accordance with the laws of the Republic of Malawi. Any disputes arising from this policy shall be subject to the exclusive jurisdiction of the courts of Malawi.

Vero360 Limited is committed to full compliance with all directives, circulars, and guidelines issued by **MACRA**, **RBM**, **MRA**, and the Malawi Police Service Cyber Crime & Digital Forensics Unit from time to time. This policy will be updated promptly to reflect changes in the regulatory or threat environment.
